NOTTINGHAM VETERINARY SAFETY CULTURE SURVEY

Dear [insert Name]

Please can you take five minutes to fill in an online survey. It has been developed from similar questionnaires used routinely in human hospitals, which ask questions about the beliefs and attitudes of staff regarding patient safety. This includes views on practice management, teamwork and communication and the causes of mistakes. The results will give us information about the current culture in the practice, and can be used to identify areas we need to work on and where we are doing well. It can also be repeated to show how our culture changes over time.

The survey is completely confidential. Some of the questions are potentially sensitive, but there are no questions which ask for your identity as it is important you feel able to answer as honestly as possible.

Please copy and paste the following link to take you to the survey.
